SUMMARY

SAP ABAP Software Engineer with 3.5+ years of experience in ABAP development, Object-Oriented ABAP (OO ABAP), and SAP technical architecture across S/4HANA Order-to-Cash and Procure-to-Pay landscapes. Dual SAP-certified (C_ABAPD_2309, C_FIORD_2404) with strong hands-on expertise in ABAP RESTful Application Programming Model (RAP), CDS Views, ABAP on HANA (AMDP), OData services, ABAP Cloud, SAP Fiori, and SAP BTP-based extensibility. Proven track record of decomposing complex business problems into incremental, deliverable components; building scalable solutions using REST APIs, RFC and IDoc message-based integrations, and event-driven interfaces; and improving ABAP program performance by up to 40 percent through HANA push-down optimization. Skilled in transaction processing, automated testing (ABAP Unit), database design, performance tuning, and debugging complex production issues, with strong communication and cross-functional stakeholder collaboration in Agile delivery environments.

TECHNICAL SKILLS

SAP Functional Areas: Order-to-Cash (O2C), Sales and Distribution (SD), Plant Maintenance (PM)

Core ABAP: SAP ABAP, Object-Oriented ABAP (OO ABAP), ABAP on HANA, RAP (Managed and Unmanaged), ABAP Cloud, Clean Core ABAP, ABAP Extensibility, Module Pool, Enhancements, BAPIs, BADIs, Userexits, S/4 HANA Cloud

ABAP on HANA: CDS Views (Interface, Projection, Consumption), AMDP, Code Push-Down Optimization, Performance Tuning, SAP HANA Data Modeling

Services and UI: OData V2/V4, SAP Gateway, RAP Service Definitions and Bindings, SAP Fiori, Fiori Elements, SAP Technical Architecture

Integration and APIs: REST APIs, SAP BTP Application Development, Side-by-Side Extensions, API Management, SAP Integration Suite (CPI), IDocs, RFC, ALE, Message-Based and Event-Driven Integration, JSON, OAuth

Development Practices: Transaction Processing, Automated Testing (ABAP Unit), Database Design and Optimization, Debugging and Root-Cause Troubleshooting, Performance Optimization

Tools and Delivery: Eclipse ADT, Git, CI/CD, Agile Delivery, Enhancement and Support Projects, Production Support, Cross-Functional Stakeholder Communication

CERTIFICATIONS

SAP Certified Associate – Back-End Developer – ABAP Cloud (C_ABAPD_2309)	Dec 2024
SAP Certified Development Associate – SAP Fiori Application Developer (C_FIORD_2404)	Apr 2025

EXPERIENCE

Software Engineer – SAP ABAP	Nov 2025 - Present
Evora IT Solutions	Pune, India

- Own end-to-end technical delivery of SAP Plant Maintenance (PM) and mobile field-service solutions, acting as a strategic technical partner to business stakeholders on process improvement initiatives.

- Led the migration of the Work Clearance Permit (WKP) Report from SAP Service and Asset Manager (SSAM) to a RAP-based SAP Fiori application, redesigning the legacy process using Object-Oriented ABAP, CDS Views, and OData V4 services while ensuring SAP Clean Core compliance within the SAM 2310→2511 upgrade project.
- Designed end-to-end SAP technical architecture including CDS data modeling, behavior definitions, service definitions, and service bindings for the WKP application, developed in Eclipse ADT, decomposing complex requirements into incremental, deliverable components.
- Developed and enhanced 5 OData services and REST APIs supporting enterprise and mobile applications, improving data access performance and transaction processing across multiple business units.
- Engineered custom BADI implementations and OData V4 service enhancements for the SAP S/4HANA Plant Maintenance (PM) module, enabling real-time mobile application support for field operations teams.
- Designed side-by-side extension patterns and message/event-based integrations leveraging SAP BTP services and S/4HANA APIs, supporting scalable enterprise and mobile solutions.
- Integrated SAP BTP services with S/4HANA backend systems using RFC, IDoc, and API-based interfaces, supporting extensibility requirements aligned with clean-core compliance standards.
- Wrote automated ABAP Unit tests and performed structured troubleshooting and root-cause analysis for production incidents involving RAP applications, OData services, and API integrations.
- Collaborated with functional consultants and a global engineering team across project streams to translate business requirements into scalable ABAP architectures, reducing rework cycles and accelerating delivery.
- Conducted code reviews and mentored junior developers on RAP, ABAP Cloud, and clean-core development best practices.

Associate ABAP Developer

Cognitus Consulting Pvt Ltd

Jan 2023 - Nov 2025

Mumbai, India

- Led migration of 6 legacy SAP GUI applications, including Module Pool programs, to RAP-based Fiori Elements applications using Object-Oriented ABAP, eliminating technical debt and achieving full clean-core compliance across the S/4HANA landscape.
- Designed end-to-end RAP applications using Interface, Projection, and Consumption CDS Views with Managed Behavior Definitions, reducing average new-feature development time by ~30%.
- Implemented RAP features including validations, determinations, actions, transaction processing logic, and draft handling for ~10 transactional business scenarios across Order-to-Cash (O2C) workstreams.
- Developed OData V4 services using RAP Service Definitions and Service Bindings for Fiori Elements applications, serving ~50+ business users per deployment.
- Designed transactional and analytical CDS Views and AMDP procedures with optimized database design supporting real-time reporting, replacing ~4 legacy ABAP reports with a single optimized Fiori Elements application.
- Developed side-by-side extension solutions on SAP BTP integrating S/4HANA backend services using REST APIs and OData services, enabling extensibility while maintaining clean-core principles.
- Built and consumed APIs using JSON payloads and OAuth-based authentication mechanisms for secure communication between SAP and external applications.
- Architected reusable RAP business objects with strict separation of concerns and strong object-oriented design principles, improving system maintainability and extensibility.
- Improved database performance and legacy ABAP program efficiency by up to 40% through code optimization and HANA push-down techniques.
- Wrote automated ABAP Unit tests and led issue analysis, root-cause investigation, debugging, and deployment of scalable ABAP solutions in Agile delivery cycles.

- Delivered scalable Order-to-Cash (O2C) solutions using modern object-oriented ABAP architecture in Agile sprints, consistently meeting delivery milestones across a ~15-member cross-functional team.

KEY PROJECTS

Block Engine | RAP, CDS, OO ABAP, ABAP on HANA, ABAP Cloud, SAP BTP

- Designed RAP-based business object including CDS data model, object-oriented behavior implementation, and OData V4 service exposure, replacing a legacy validation framework serving ~200 business rules.
- Implemented complex validation logic, determinations, and dynamic rule evaluation within the RAP behavior layer, reducing manual configuration effort by ~35%.
- Built configuration and monitoring applications using Fiori Elements powered by RAP services, enabling non-technical users to manage rules without SAP GUI access.
- Exposed RAP business services as REST APIs enabling integration with external systems and cloud-based applications.
- Ensured full clean-core compliance throughout delivery, making the solution upgrade-safe for future S/4HANA releases.

Multipayer Solution | RAP, CDS, S/4HANA, OData V4, AMDP

- Developed RAP services integrated with Fiori applications enabling real-time transaction processing of Sales Contracts across 3 funding streams within Order-to-Cash workflows.
- Designed CDS-based data models and database schema supporting flexible funding allocation and analytical reporting scenarios, reducing report generation time by ~25%.
- Developed API-enabled services supporting secure data exchange using REST principles and JSON payload structures.
- Implemented scalable RAP-based ABAP extensibility enhancements improving system maintainability and reducing future change effort.

EDUCATION

Bachelor of Technology, Mechanical Engineering , Government College of Engineering	2017 - 2021
Full Stack Web Development (JavaScript, React, Node.js), Acciojob	Aug 2022 - Mar 2023

LEADERSHIP & CONTRIBUTIONS

- Mentored 4 junior developers on RAP, CDS, object-oriented ABAP, and ABAP Cloud development practices, accelerating onboarding for new S/4HANA cloud projects.
- Delivered 5+ internal knowledge-sharing sessions on Clean Core, RAP, and modern SAP architecture, upskilling a team of ~8 developers across two project streams.
